## FEPLT0100 – Equipment Location Transfer

```

Location Transfer

Item Number 10823
From Loc    SHOP
To Loc     MSHOP
Quantity    1

Enter to accept...

Submit Refresh Clear Exit
    
```

This transaction creates equipment location information to track equipment locations as you physically transfer equipment from on job site or business unit to another. The system uses the location information entered to update the Location Tracking table (F1204).

The following conditions apply to the RFGGen implementation for the Information Entry transaction within the EnterpriseOne environment.

Note: any of these parameters may be easily adjusted to meet the unique requirements of your company.

### ✓ Validations

Prompt	Table	Field
Item Number	F1204	FMNUMB
From Loc	F0006	MCMCU
To Loc	F0006	MCMCU

### ✓ Edits

Condition	Table
Quantity entered =>0	NA

### ⇄ Function Keys

Key	Function
F1	Search Data for Current Field
F2	Refresh the Current Screen Display
F3	
F4	Exits Transaction

## **Considerations**

1. What EnterpriseOne version is used to process the Location Transfer transaction?
2. What processing options have been set to process Location Transfer?
3. Will Transfer Numbers be entered or defaulted using next number?

## EnterpriseOne Programs - Reference

Application Name(s)	Code	Table
Equipment Location Transfer	P12115	F1204

## EnterpriseOne Location Transfer: P12115

## How JDEdwards® Processing Option affects RFGen

This documentation explains which of the JDE Processing Options are used by RFGen and how the red highlighted Proc.Options effect the RFGen script.

### Affected RFGen Forms and Transaction Macros

Description	Form name	Transaction Macro Name
EPM – Location Transfer	FEPLT0100	TEPLT0100

### Setup an RFGen Menu

To implement an RFGen Form using JDE Processing Options in an RFGen Menu the JDE Version needs to be specified.

Enter the Form name, followed by a Space. Enter “-Vers=” and the JDE Version.

Form/Menu	Description to Display
FEPLT0100 -Vers=ZJDE0001	2-Location Transfer

## Processing Options: P12115 Location Transfer

```
---- <-- Update -->
0001 1 1> Location --> [ ]
---- <-- Versions -->
0002 2 1> Asset Master (P1201) --> [ ]
0002 2 2> Location Transfer (P12115) --> [ ]
```

## Test Script Description: Location Transfer (P12115)

### RFGGen Input Requirements

Before you begin testing, ensure, for all equipment numbers you will be testing, that the following is setup in EnterpriseOne or PeopleSoft World.

- a. Item Number
- b. (From) Business Unit – Location
- c. (To) Business Unit – Location

### JD Edwards Processing Option Settings

Enter the Processing Option values, which correspond, to the version you selected for testing.

JDE Version: ZJDE0001 \_\_\_\_\_

Tab	Processing Option Description	Value

### Execution Procedures

Id	Test Case	Expected Result	Pass	Fail
1	Type in an Item _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the item number entered—if the item number is invalid, an error message will be displayed.		
2	Type in a (From) Location _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the location entered—if the location is invalid, an error message will be displayed.		
3	Type in a (To) Location _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the location entered—if the location is invalid, an error message will be displayed.		
4	Type in a Location _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the location entered—if the location is invalid, an error message will be displayed		
5	Type in a Quantity _____ Press the <b>ENTER</b> key	RFGEN will validate and accept the quantity entered—if the quantity is invalid, an error message will be displayed		
6	Press the “F1” key with the cursor in the Item Number field to select and return an Item Number	RFGEN will display a list of items and when selected, the item number will be returned to the Item number field—if the item number is invalid, an error message will be displayed.		

7	Press the "F1" key with the cursor in the From Loc field to select and return a Location	RFGEN will display the current location and when selected, the current location will be returned to the 'from loc' field—if the location is invalid, an error message will be displayed.		
8	Press the "F1" key with the cursor in the To Loc field to select and return a Location	RFGEN will display a list of locations and when selected, the location will be returned to the 'to loc' field—if the location is invalid, an error message will be displayed.		
9	At the RFGEN "Enter to Accept Prompt" the transaction is added to the Enterprise One/PeopleSoft World	Confirm the location transfer results
