

# Cedar Bay Data Capture for Acumatica

## STREAMLINING & SIMPLIFYING YOUR BUSINESS

The Cedar Bay automated data capture software delivers standard transactions in a simple-to-deploy, flexible, integrated solution. It eradicates errors from your business processes, capturing information at point of creation and improving accuracy and traceability. We can also deploy solutions to help you work beyond the four walls of your factory.

Cedar Bay implement a range of standard configurable transactions; to create an advanced manufacturing environment that's unique to each particular customer. The Cedar Bay solution supports Windows and Android devices and tablets with the aim of providing functionality across all areas of business, from receipt to shipment.

## MARKET SECTORS

Cedar Bay have years of experience in helping businesses use the Cedar Bay Data Capture solution in a variety of industries including: manufacturing and distribution, automotive, medical, oil and gas, food and beverage, engineering and project.
