

SUPPORTING YOUR FUTURE

WITH IFS CLOUD

ERP DESIGNED FOR YOUR FUTURE

Today's reality of the food and beverage industry is tough. Competition is high. Retailers have driven down prices and profit margins are low. Companies are required to source sustainable ingredients, with a transparent supply chain, yet can't pass the additional costs onto the consumer. If this wasn't enough the industry is also facing fundamental changes in the consumer, food safety, traceability spheres, which are set to change the industry beyond recognition.

Many organisations that sit in this vertical now require technology solutions that provide the tools needed to gain and maintain a competitive edge. IFS Cloud offers an industry specific solution that helps you balance supply and demand, streamline your supply chain, deal with growing regulations and most importantly meet the needs of your customers. With lot/batch traceability, recipe management, shelf life and positive release points capabilities, IFS is truly designed to meet the needs of your food and beverage business.

With IFS, you get the agility to handle your production and processing requirements, whatever your needs are—and regardless of whatever direction your business takes in the future.

With the experience of the Cedar Bay team who have spent years working with food and beverage companies and helping them excel, alongside cutting edge technology, you're in the perfect position to keep succeeding.

IFS CLOUD GIVES YOU

- Field to Fork Traceability
- Superior planning and quality capabilities
- Leading edge technology
- Enterprise wide visibility to drive profit improvements
- Food and Beverage focused functionality
- A proven solution

DISCOVER MORE

IMPROVED SUPPLY CHAIN VISIBILITY

A flexible and agile supply chain network is key.

We know how important it is to balance efficiencies and ensure you respond effectively to fluctuations. With an integrated planning environment you have an instant, accurate overview of your entire supply chain. You gain the flexibility and collaboration techniques you need to react quickly to the needs of your market.

Streamline your methods, with less paperwork, lower inventories and cost savings. IFS Cloud can help with scan-based picking, production recording and delivery to your distribution centre, or direct to customers. Web portals and support for EDI messaging provides instant communication between all stakeholders in the supply chain.

MORE ACCURATE DEMAND PLANNING

Goods when & where your customers need them.

There's a growing recognition for the importance of adaptability and demand planning. With integrated demand planning that interacts with the master schedule you can ensure that your goods are available for delivery when and where your customers need them. The IFS Demand Planner allows external data, like weather and promotions, to be used together with machine learning to increase the accuracy of your forecasts.

You can work with multiple master schedule scenarios before selecting the one against which production should be planning.

What's in store moving forward? Sustainability pressures in the food and beverage industry are growing, are you ready?

02 SUPPORT & SAFETY

We've helped businesses in the food and beverage industry discover their potential.

SEE WHAT OUR CUSTOMERS HAVE ACHIEVED HERE.

BETTER INSIGHT, GREATER EFFICIENCY

Monitor performance the easy way.

Imagine yourself behind a digital dashboard that gives you an instant snapshot of key areas of your business and lets you zoom in on critical details and make necessary changes. Using industry specific metrics, you can monitor performance, product quality, costs, delivery times, or any other aspect of your enterprise that you feel is important to profitability.

Role based user experience is designed for people right across your enterprise, from the shop floor to the leadership team, and even extended to your customers and suppliers. Giving everyone access to the real-time information they need, when they need it, wherever they are.

INCREASED SAFETY, LOWER RISK

Avoid product recalls, analyse with ease.

Food safety has always been of paramount importance to the food and beverage industries, never more so than now. That's why it's so important to address it proactively to ensure for compliance. With IFS Cloud you have the quality management tools and audit and quality testing you need to be able to analyse your processes and spot potential problem areas.

You can easily trace quality issues to specific lot and batches, helping you comply with the regulations and avoiding product recalls.

FLEXIBLE SUPPORT FOR MANUFACTURING PROCESSES

The manufacturing flexibility you need.

However your production process looks, IFS Cloud is designed and built to support you. You have the flexibility to switch from one manufacturing mode to another, to satisfy customer demands effectively. It doesn't matter how complex your supply chain strategy may be, you can always run smoothly.

03 EFFICIENCY & INDUSTRY SPECIFICATIONS

WHAT OUR CUSTOMERS SAY ABOUT US

We have a variety of customers in the food and beverage industry, see what some of them have to say...

From dairy producers, through to baked goods manufacturers, our customer base within the sector faces varying demands and requirements. With Cedar Bay and IFS Cloud these businesses have had the tools they need to tackle their industry challenges and prepare themselves for the future.

“

Cedar Bay has been a great partner for Heaven Hill Brands, their technologies and solutions have kept us moving forward during a boom for our industry.

Kevin Andrew, Master Data Inventory Manager, Heaven Hill

“

Engaging with a partner like Cedar Bay brought obvious knowledge and expertise, they were able to independently challenge how we did things.

Michael Dick, Head of IT, First Milk

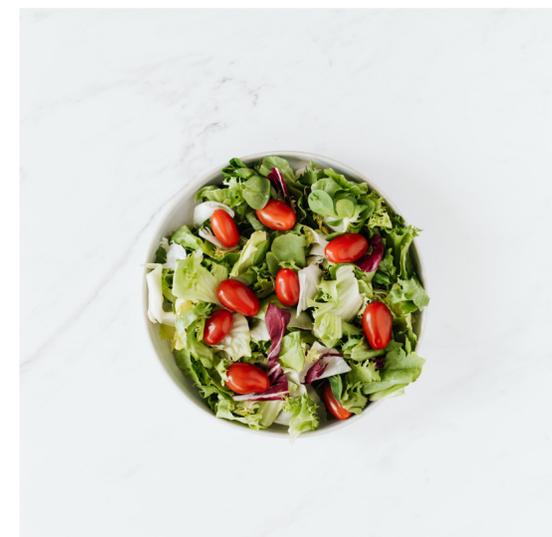

Read the Case Study

“

Our IFS project was greatly successful in realising our business objectives, since this we have completed our implementation across the three main sites.

David Thackray, Group IT Manager, Vitacress
